

# **HAYWARD**<sup>®</sup> ENERGY SOLUTIONS

# Energy efficiency runs in the family.

## High performance. Energy Efficient.

HaywardTriStar® 2-speed pump and TriStar Energy Solution™ Variable-Speed Pump and Controls deliver your biggest energy dollar savings. The TriStar's 2-speed efficient hydraulics reduces energy wasting backpressure and lowers your energy bill up to 70% quietly. The TriStar Energy Solution Variable-Speed Pump System has up to 8 programmable speeds that can lower your energy usage by up to 75% when operated remotely through the optional Goldline Pro Logic™ Control. TriStar maximizes water flow while minimizing energy consumption, so both you and your energy bill can relax easier.

## The hunt for dirt and debris is on.

The TigerShark® by Hayward utilizes an on-board computer to program the most time and energy-efficient cleaning pattern for a spotless clean. This cleaner uses substantially less energy than other types of cleaners because it doesn't run off your pool's filtration system and doesn't need a booster pump. The TigerShark is ready to go within 10 minutes of taking it out of the box. It pays for itself in as little as 6 to 12 months.

## Low maintenance. No backwash.

The Hayward SwimClear™ Energy-Efficient large capacity cartridge filter's superior water flow reduces energy-wasting backpressure for a bigger, better, more efficient clean. No backwashing enables you to clean your filtration system without wasting 800 to 2,500 gallons of water every season. SwimClear saves money, time and energy, while allowing you to enjoy your backyard experience the way it was meant to be.

## The perfect water temperature everyday, for the perfect backyard paradise.

The water temperature is always right with a Hayward HeatPro® heat pump. The everyday efficiency of a HeatPro heat pump provides the perfect backyard environment saving you up to 80% on operating costs when compared to gas heat. With its precision electronic temperature control, the perfect water temperature is maintained all day, everyday, providing energy savings for years to come.

TRISTAR®

ON YOUR HEATING COSTS

## Keep your pool warm and your fuel costs cool.

You'll notice the difference the moment you step in the water. This world-class Hayward Universal H-Series heater combines the very latest heating technology for rapid heating of your pool and spa with industry-leading hydraulic design. This enables low-speed pump operation or reduces circulation pump run-time to provide energy savings of up to 30%. Precision electronic management of the water temperature maintains your comfort while preventing wasted energy. This low NOx emissions heater is perfect for you and the environment.

## Light up your nightlife with irresistible colors.

Hayward ColorLogic® LED lighting is the perfect choice to enhance your backyard's party atmosphere. Brighten up your night with five enticing fixed colors and an unprecedented seven exciting color-changing shows. ColorLogic LED lights are energy efficient, requiring 75% to 90% less energy than traditional pool lighting. ColorLogic LED lighting burns longer, minimizing replacement and disposal costs.

## All the control you need to control your costs.

Pro Logic™ from Goldline Controls takes the work and cost out of owning a pool and spa. Automate pool and spa cleaning and filtration to run at off-peak hours for significant energy cost reductions in many states. Automating your 2-speed and variable-speed pumps can save you up to 75% on energy costs. Adding salt chlorination eliminates traditional chemical chlorine and chemistry automation further reduces energy consumption while balancing your water. For even greater energy savings, add a Solar Expansion Kit to control your pool's solar heating and cooling system.

Energy efficiency is great for the environment.

Especially, your backyard environment.

Our Hayward Energy Solutions™ line of products is designed to be just as good for the Earth as it is for the pool owner. Not only will you find environmentally conscious products that save energy and money, but they'll also enhance the overall pool experience as well. We added energy to the place that mattered most – our lineup, not your utility bill.

ON ENERGY COSTS BY MANAGING EQUIPMENT

## Save all of your energy for the fun.

At Hayward/Goldline, we're proud to engineer quality, cost-effective and energy-efficient pool and spa equipment. That's why we're able to consistently deliver the highest-value equipment for your pool and spa. Energy Solutions products by Hayward/Goldline go a step further. These products save energy, water, run quieter and reduce operation costs which all help protect the environment. But most important, Energy Solutions products reduce the costs that go into operating a pool. Which means you can enjoy your pool or spa for what it was originally intended for – your place to relax.

	Reduces Impact on Environment	Reduces Cost of Pool Operation	Reduces Energy Use	Reduces Chemical Use	Reduces Carbon Footprint	Perfect for new pools and easy upgrade to existing pools
