

Pristine water.
Pure and simple.

SANITIZATION

HydroRite™ UVO₃

UV OZONE ADVANCED WATER TREATMENT SYSTEM

Total System: Pumps | Filters | Heating | Cleaners | **Sanitization** | Automation | Lighting | Safety | White Goods

**Every oasis deserves
water this pure.**

WHERE CHLORINE ENDS, UV AND OZONE BEGIN.

UV + OZONE + ADVANCED OXIDATION = 100% PURE WATER

For the ultimate in water quality and clarity, choose Hayward®'s HydroRite™ UVO₃. An advanced water treatment system like no other, HydroRite UVO₃ combines UV with Ozone to produce a third disinfectant called Advanced Oxidation. These three work synergistically to eliminate 99.9% of bacteria and deliver a level of purity unmatched by any other sanitization method.

HydroRite UVO₃'s premier sanitization works in collaboration with chlorine or another sanitizer to dramatically reduce overall chemical usage and even lessen total chlorine demand by 50% or more.

With less chemicals used, it's the more natural way to sanitize that's friendly to both the environment and your wallet. HydroRite UVO₃ also reduces chloramines by 50% or more to eliminate harsh chlorine odors and maximize swimmer comfort.

For the finest level of sanitization that's as sophisticated as its owner, HydroRite UVO₃ swims laps around any other individual UV or Ozone system. From deep end to shallow end, enjoy the luxury of truly pristine water.

WATER QUALITY

Delivers exceptional sanitization and the finest level of water clarity and purity.

REDUCES CHLORAMINES

Cuts chloramines by 50%, eliminating chlorine odors and maximizing swimmer comfort.

COST SAVINGS

Reduces overall chemical usage and chlorine demand by 50% or more, cutting your chemical costs.

NATURAL SANITIZATION

Reduces overall chemical usage and chlorine demand to provide a natural and environmentally friendly swim experience.

TWO ADVANCED SYSTEMS. ONE COMPLETE CLEAN.

When pairing HydroRite UVO₃ with Hayward's industry-leading salt chlorination, you can expect a completely new level of water quality and swimmer experience. Choose from any of our in-ground systems—including AquaRite®, the world's #1 salt chlorinator—for an easy and cost-effective way to deliver the most luxurious swim experience you'll ever feel.

THE BEST IN UV AND OZONE TECHNOLOGY

Hayward® takes UV and Ozone technology to the next level with HydroRite™ UVO₃. Historically used separately as disinfectants in the swimming pool and drinking water industries, Hayward's innovative engineers have brought you the best of both worlds in a combined UV and Ozone vessel.

- Uses a multi-functional, dual wavelength lamp to simultaneously treat water with both UV and Ozone.
- The interaction of Ozone with UV light rays within the HydroRite UVO₃ vessel create another potent disinfectant called Advanced Oxidation.
- This trio of disinfectants eliminate 99.9% of bacteria in swimming pools so effectively, many health codes are beginning to require the technology on public pools.
- The elimination of bacteria also creates sparkling clear water, beyond what a filter can offer.
- Treating water with HydroRite UVO₃ also reduces chemical demand by 50% or more and alleviates irritating chloramines.

HYDRORITE UVO₃ ORDERING CHART

HYD-UVO	HydroRite UVO ₃ system for residential in-ground pools
