

Chemical Feeders

AUTOMATIC CHLORINATORS AND BROMINATORS

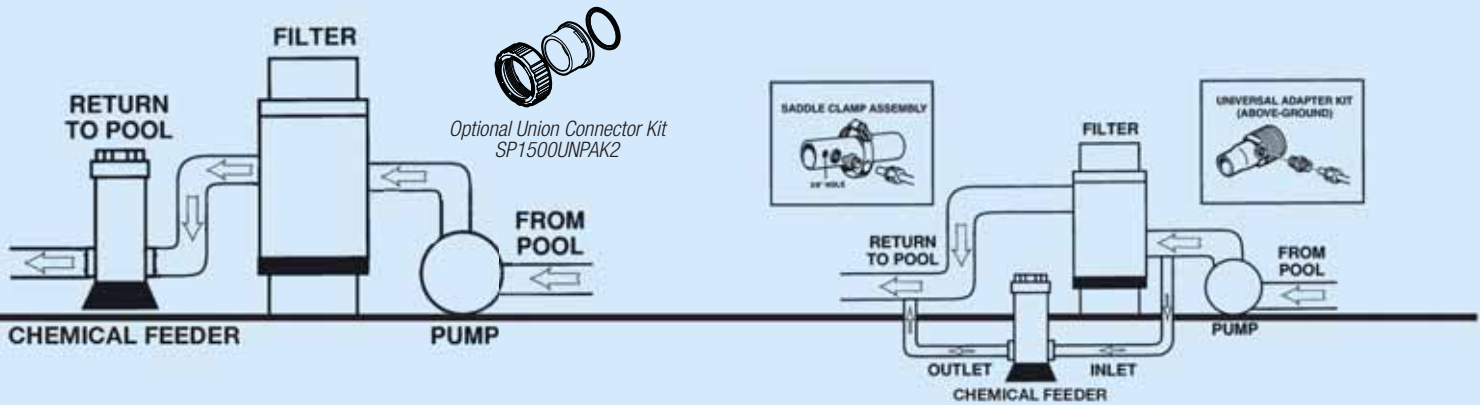

WHITE GOODS

The easy, economical way to sanitize your pool automatically

Hayward® automatic chlorinators and brominators are ideal for in-ground and above-ground applications during new pool construction or aftermarket installations. Models are available for in-line and off-line configurations to accommodate all capacity, plumbing and space considerations. These units incorporate a durable ABS body along with a high quality Viton® seal and an ergonomically designed cover to allow for safe and simple lid removal.

Hayward® In-Line and Off-Line Feeders

CL100 and CL200 In-Line Feeders

CL100 and CL200 in-line feeders are built with 1 1/2" FPT threaded inlets and outlets. For serviceable PVC piping installations, optional 1 1/2" socket flush union connectors are available to provide an easy and professional installation.

CL110 and CL220 Off-Line Feeders

CL110 and CL220 off-line feeders install next to the filter system and work on system pressure differential. They connect easily with compression couplings for new or existing systems. All necessary connectors and tubing are furnished with each feeder.

Hayward Automatic Chemical Feeders

Hayward automatic chemical feeders are sized to handle the sanitizing needs of most pools and spas. The product line consists of 9 pound and 4.2 pound chemical capacity units which feature a large dial control valve for easy and accurate adjustment of the chemical feed rate.

Features and Benefits:

- Models available for chlorine or bromine sanitization
- 9 lb. and 4.2 lb. chemical capacity configurations for in-ground and above-ground pools and spas of all sizes
- Uses large or small, slow dissolving, chlorine or bromine tablets
- Simple installation for new construction, aftermarket or replacement applications with multiple in-line and off-line configurations available
- Large dial control valve allows for simple feed rate adjustment
- Easy-Lock threaded cover for safe and convenient access to tablets
- Corrosion-resistant components and high quality Viton® seal for extended durability and easy lid removal
