Reinventing Pool Safety with CamerEye

First AI Camera Pool Alarm to Meet **ASTM F2208 Certification and Conforms to UL2017 and ISPSC**

CamerEye adds a new layer of pool safety that detects people and petsonly– without door alarms or false triggers.

CamerEye is already approved and in use in several cities and counties nationwide.

USPC

The Most Advanced, Reliable and Tested Pool Alarm

Detects People and Pets Before Entering Water

Why Is CamerEye Unique?

CamerEye is the world's first AI system and camera-based pool alarm system to meet ASTM F2208 standards.

Only Type C perimeter pool alarm that detects people and optionally pets before they enter the water.

Replaces door alarms, floating pool alarms, and in-pool splash alarms.

Triggers alarms for humans and pets ONLY.

Does not trigger for toys, birds, and non-human objects.

Works reliably for toddlers, young kids and adults.

Alarm Features

Multiple alarm locations that sound inside and outside.

Alarms sound at 95 dB - a full 10 dB over required levels.

Automatically resets after three minutes as required by standards.

Additional notifications available through the included CamerEye app.
